

Joseph A. Hill, M.D., Ph.D.
Professor of Internal Medicine and Molecular Biology
James T. Willerson, M.D. Distinguished Chair in Cardiovascular Diseases
Frank M. Ryburn, Jr, Chair in Heart Research
Chief, Division of Cardiology
Director, Harry S. Moss Heart Center
University of Texas Southwestern Medical Center

Dr. Hill is a cardiologist-scientist whose research focuses on molecular mechanisms of remodeling in the stressed myocardium. He graduated with an MD, PhD from Duke University. Next, he pursued postdoctoral scientific training at the Institut Pasteur in Paris, followed by clinical training in Internal Medicine and Cardiology at the Brigham and Women's Hospital, Harvard Medical School. Dr. Hill served on the faculty of the University of Iowa for 5 years before moving in 2002 to the University of Texas Southwestern Medical Center to assume the role of Chief of Cardiology and Director of the Harry S. Moss Heart Center.

Dr. Hill's research group strives to decipher mechanisms of structural, functional, and electrical remodeling in heart disease with an eye toward therapeutic intervention. Dr. Hill serves on numerous committees, boards, and study sections, and he lectures widely. In addition, he

serves on several editorial boards, including *Circulation Research: Senior Consulting Editor*, *American Journal of Physiology*, *Heart and Circulatory Physiology*, and *American Journal of Cardiology*. He serves as Editor-in-Chief of the textbook *Muscle: Fundamental Biology and Mechanisms of Disease*. He has received numerous recognitions and awards, including election to the Association of American Professors; he recently served as President of the Association of University Cardiologists and chair of the Academic Council of the American College of Cardiology. Presently, he serves as Editor-in-Chief of *Circulation*. Dr. Hill maintains an active clinical practice focusing on general cardiology, heart failure, and hypertension.
