

CURRICULUM VITAE

Name: Tatsuo Shimosawa,

Date of Birth: November 13, 1962

Birth Place: Tokyo, Japan

Nationality: Japan

<http://scholar.google.co.uk/citations?user=rpKPCZMAAAJ&hl=en>

Education:

1997 Ph.D. (Dr. of Medical Science), Tokyo University (Thesis: Physiological role of proadrenomedullin N-terminal 20 peptide) Mentor: Prof. Toshiro Fujita.

1988 M.D., Tsukuba University School of Medicine, Ibaraki, Japan

Professional Training and Employment:

2018-present Professor, Department of Clinical Laboratory, Graduate School of Medicine, International University of Health and Welfare, Chiba

2018-present Visiting Professor, Hebei University of Chinese Medicine, Hebei, China

2017-present Professor and Chair person, Department of Clinical Laboratory, Faculty of Medicine, International University of Health and Welfare, Chiba

2017- present Chief in Clinical Laboratory, Mita Hospital, International University of Health and Welfare, Tokyo

2005- 2017 Lecturer, Department of Clinical Laboratory, The University of Tokyo, Tokyo

2001- 2005 Assistant Professor, Department of Clinical Laboratory, The University of Tokyo, Tokyo

1997- 2001 Assistant Professor, Department of Nephrology and Endocrinology, The University of Tokyo, Tokyo,

1997- present Research associate, Department of Molecular Pathology, Tokyo Metropolitan Institute for Gerontology

1990- 1993 Medical Staff in Internal Medicine, The University of Tokyo, Tokyo

1989- 1990 Resident in Cardiology, Tokyo Metropolitan Geriatric Center, Tokyo

1988- 1989 Resident in Internal Medicine, Tokyo University, Tokyo

Research fields

I have been studying the pathophysiology of hypertension and its related organ damage. My main focus is vasoactive and volume regulating factors such as adrenomedullin, aldosterone, catecholamine. I originally revealed the sympatholytic effect of adrenomedullin related peptide, proadrenomedullin N-terminal 20 peptide (J Clin Invest 1995). I generated adrenomedullin knockout mice and revealed the relation

between oxidative stress and hypertension related organ damages (Circulation 2002 and others).

Recently I and my students clarified two new etiologies of salt-sensitive hypertension; aldosterone-independent mineralocorticoid receptor activation by Rac1 (J Clin Invest 2011) and epigenetical modification by catecholamine (Nat Med 2011).

Current research field is to further investigations on salt-sensitive hypertension and epigenetic regulations.

Licensure and Certification:

- | | |
|------|---|
| 2015 | Fellow of the Japanese Society of Internal Medicine |
| 2010 | Board Certified Member of the Japanese Endocrine Society |
| 2008 | Board Certified Member of the Japanese Society of Hypertension |
| 2007 | Board Certified Member of the Japanese Society of Laboratory Medicine |
| 1996 | Board Certified Member of the Japan Geriatrics Society |
| 1991 | Board Certified Member of the Japanese Society of Internal Medicine |

Awards and Honors:

- 2011 Japanese Society of Laboratory Medicine Research Award
2004 Japan Society of Endocrinology Research Award
2001 Japan Society of Hypertension Young Investigator Award

Memberships, Offices and Committee Assignments in Professional Societies

- 2018-present Director of Japanese Society of Hypertension
2017-present Director of Japanese Society of Cardiovascular Endocrinology and Metabolism
2014-present Board member of Japanese Society for Medical Use of Functional Foods
2014- present Fellow of Japanese Society of Laboratory Medicine
2006- present Fellow of American Heart Association
2004- present Fellow of Japan Geriatrics Society,
2004- present Fellow of Japanese Society of Nephrology,
2003- present Fellow of Japan Endocrine Society,
2002- present Fellow of Japanese Society of Hypertension,
2001- present Fellow of Japanese Society of Cardiovascular Endocrinology and Metabolism,

Editorial board membership

- Hypertension Research, PLoS One, International Journal of Cardiology, Current Hypertension Reports

Memberships and Committee Assignments in non-Professional Societies

1998- 2003 Board member of Japan Clarinet Society, Senior Director

2003- present Vice Chairperson of Japan Clarinet Society

Lectureship

106 lectures at either domestic or international scientific meetings.

Grants

Grants in Aid from Japanese Government

Title	Grants No.	Years	PI
Salt-sensitive hypertension and vascular dysfunction	17K09724	2017 – 2020	Tatsuo Shimosawa
Development of a novel strategy for life style disease through exploration of the roles of mineral- and gluco-corticoids in hypertension and organ dysfunction	15H05788	2015 – 2020	Toshiro Fujita
Epigenetical regulation in cardiorenal syndrome by sympathetic nerve activity	26461249	2014 – 2016	Tatsuo Shimosawa
Protective effect for antioxidative peptide against disruption of blood brain barrier induced ischemic injury	24500423	2012 – 2014	Takao Urabe
Investigation of cardio-pulmonary disorder in the animal model of sleep apnea syndrome	23590843	2011 – 2013	Koushi Nagai
Mechanisms and diagnosis of salt-sensitive hypertension in view point of epigenetics	23591213	2011 – 2013	Tatsuo Shimosawa
Insulin resistance and protective role for antioxidative peptide in ischemic white matter damages	21500338	2009 – 2011	Takao Urabe
Clarification of the mechanism of metabolic and vascular regulation by RAMP and its application in metabolic disorders and vascular injuries.	20390221	2008 – 2010	Takayuki Shindo
Pathophysiological mechanisms and therapeutic targets in multiple organ damages in metabolic syndrome	20591048	2008 – 2010	Tatsuo Shimosawa
Production and characterization of Adrenomedullin (-/-)<->(+/+) and RAMP2(-/-)<-> (+/+) chimeric mice	18590366	2006 – 2007	Takayuki Sakurai
Therapeutic potency of platinum nanoparticle in metabolic syndrome	18591016	2006 – 2007	Tatsuo Shimosawa

Targeting oxidative stress and new therapy in metabolic syndrome	17209034	2005 – 2007	Toshiro Fujita
Therapeutic potency of antioxidative peptide in metabolic syndrome	16590660	2004 – 2005	Tatsuo Shimosawa
Analysis on formation and protection of athelosclerosis by using genetical engineering, role of LOX-1 and PPARy	14657164	2002 – 2003	Toshiro Fujita
Role of LOX-1 and protective effect of PPARy in the development of atherosclerosis	14570641	2002 – 2003	Katsuyuki Ando
Organ protective effect of adrenomedullin, studies using knockout mice.	13670693	2001 – 2003	Tatsuo Shimosawa
Study on salt-sensitive hypertension and related organ damages by using gene knock out technique	12877103	2000 – 2001	Toshiro Fujita
Role of oxidized LDL/LOX-1 in the development and progression of renal disease.	12470209	2000 – 2002	Toshiro Fujita
Effect of Proadrenomedullin N-terminal 20 peptide on sympathetic nerve activity	11770625	1999 – 2000	Tatsuo Shimosawa
PHYSIOLOGICAL ROLE OF ADRENOMEDULLIN BY MOLECULAR BIOLOGICAL AND GENE ENGINEERING APPROACH	10218201	1998 – 2002	Toshiro Fujita
Regulation of vascular p38 mitogen-activated protein kinase and its role in the vascular function	10671030	1998 – 1999	Katutoshi Takahashi
Multiple mechanisms for vasodilator effect of magnesium	3454249	1991 – 1993	Toshiro Fujita

Publications

145 Original Articles, 86 Books, Book chapters, 265 Reviews (including Japanese),

* Most important papers are indicated

Original Articles

1. Ando K, Takahashi K, Ono A, Shimosawa T, Ogata E, Fujita T.
Possible role of sodium-hydrogen antiport in acetylcholine-induced relaxation of rat aorta.
Biochem Biophys Res Commun. 177:407-413, 1991.
2. Ando K, Sato Y, Ono A, Takahashi K, Shimosawa T, Ogata E, Fujita T.
Antihypertensive effect of dietary calcium loading in angiotensin II-salt rats.
Am J Physiol. 261:1070-1074, 1991.
3. Kuwajima I, Suzuki Y, Shimosawa T, Otsuka K, Kawamura H, Kuramoto K.
Effect of nifedipine tablets on ambulatory blood pressure in patients aged less than 60 and greater than 65 years with systemic hypertension.
Am J Cardiol. 68:1351-1356, 1991.
4. Kuwajima I, Suzuki Y, Hoshino S, Shimosawa T, Kanemaru A, Sakai M, Kuramoto K.
Effects of aging on the cardiopulmonary receptor reflex in hypertensive patients.
Jpn Heart J. 32:157-166, 1991.
5. Suzuki Y, Kuwajima I, Hoshino S, Kanemaru A, Shimosawa T, Matsushita S, Kuramoto K.
Cardiac performance in elderly hypertensive patients with left ventricular hypertrophy: responses to isometric exercise and beta-agonists.
